

IMGENEX India Pvt. Ltd. is the only Biotech Company in the Eastern region of India involved in developing tools for understanding a variety of disease process. IMGENEX India recently been awarded with Emerging Company of the Year 2015 under the Bio Industrial category at Bangalore India Bio conference held from February 9-11, 2015. Bangalore Bio is the biggest Biotech event in India. The event was organized by the Department of IT, BT and S&T, Government of Karnataka in association with Vision Group on Biotechnology, and Association of Biotech Led Enterprises (ABLE). IMGENEX India was selected from hundreds of companies in India for this award for harboring innovative ideas and for playing a lead role in industrial biotech research.

IMGENEX India is the largest antibody producing company in India with a state-of-the-art ISO 9001:2008 certified R&D facility in Bhubaneswar. Its R&D laboratory was inaugurated by **Dr. APJ Abdul Kalam, the then Hon'ble President of India**. Apart from generating landmark novel research tools for scientists in India and abroad, for the last few years, it is also involved in many innovative research projects funded by Govt. of India. Dr. Sujay Singh, Founder and MD, cherishes the dream to produce therapeutic antibodies as a cure against deadly disease, cancer. IMGENEX India works in technical collaboration not only with leading Research Institutes in India but also with International laboratories beyond the boundary and has quickly emerged as a Research based Biotech Company. It was also the recipient of BioSpectrum Asia-Pacific Emerging Company of the Year 2011 by BioSpectrum, Singapore. Its goal is to be at the forefront of the scientific development and is incessantly thriving to make IMGENEX India a leader in the biotech industry and to put Odisha in the World biotech map.
